Typical Specification

+Not available with LFSH1434DV

DV water temperature control system shall be factory assembled and tested and include a stainless steel or painted steel cabinet. It shall include two thermostatic mixing valves capable of maintaining water temperature to $5^{\circ}F$ ($3^{\circ}C$) above set point. DV shall include two HydroGuard® XP LFSH1430 Series Master-Tempering Valve with advanced, paraffin-based actuation technology. The valves shall be constructed using Lead Free* brass. Lead Free* brass valves shall comply with state codes and standards, where applicable, requiring reduced lead content. DV shall also include copper piping, ball valve(s) and temperature/pressure gauge for diagnostics. The tempering valve shall have union checkstops, an outlet temperature range of $90 - 160^{\circ}F$ ($32 - 71^{\circ}C$) (with lockable means), and a single seat design for positive shutoff. Valve shall be ASSE 1017 listed and CSA certified. Minimum flows to ASSE 1017 shall be 2.0 gpm (8 lpm) for LFSH1432 DV and LFSH1434 DV.

Valve shall be a Powers' model _____. All alternatives must have written approval prior to bidding.
