LEAD FREE*

HydroGuard® XP LFSH1434 Triple Valve

Supply Fixture Wall Mount Cabinet

Features

- Features Lead Free* construction to comply with Lead Free* installation requirements.
- Paraffin-based advanced thermal actuation technology to sense and adjust outlet temperature
- Dirt and lime resistant poppet and seat design
- · Virtual shutoff if supply pressure fails
- · Vandal-resistant locking mechanism to secure temperature setting
- Factory tested as a complete unit
- Mounted on heavy-duty welded struts
- · Stainless steel or white painted cabinets
- Pressure/Temperature Gauges, Ball valves

Maximum Hot Water Supply Temperature 200°F (93°C)

Minimum Hot Water Supply Temperature**..... 5°F (3°C) Above Set Point

Minimum Flow*** ... 0.5 gpm (1.9 lpm)

Maximum Operating Pressure ... 125 psi (861 kPa)

Temperature Adjustment Preserviting A

Temperature Adjustment Range***** 90 – 160°F (32 – 71°C) Hot Water Inlet Temperature Range 120 – 180°F (49 – 82°C) Cold Water Inlet Temperature Range 40 – 80°F (4 – 27°C) Listing/Compliance (Valve Only) ASSE 1017, CSA B125

*The wetted surface of this product contacted by consumable water contains less than 0.25% of lead by weight.

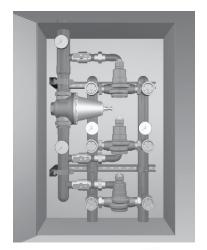

** With Equal Pressure

*** Minimum flow when Hi/Lo valve is installed at or near hot water source recirculating tempered water with a properly sized continuously operating recirculating pump.

Low limit cannot be less than the cold water temperature. For best operation, hot water should be at least 5°F (3°C) above desired set point.

Capacity

Cabinets Stainless Steel, Wa Painted Steel, Wa			Q U
Alarm None			0

Recirculation Piping Diagram

Please see Piping Diagram Section of this catalog.

Typical Specification

Triple-Valve Hi/Lo Temperature Control System should include three thermostatic valves capable of maintaining water temperature to within the range of $90-160^{\circ}F$ ($32-71^{\circ}C$). Valves must compensate for fluctuations due to inlet water temperature changes. The valves shall be constructed using Lead Free* brass. Valves shall comply with state codes and standards, where applicable, requiring reduced lead content. Valves shall have triple-duty checkstops and must have advanced, paraffin-based thermal actuation technology in order to guarantee a precise control when tested in accordance with ASSE 1017 and CSA B125. Thermostatic valves must be ASSE listed and CSA approved. Triple-Valve Hi/Lo System must include PRV, ball valves, pressure/ temperature gauges and mounted on heavy-duty metal struts. It shall also include a stainless steel or painted steel cabinet.

The Hi/Lo system shall be of Powers' Triple Valve Hi/Lo Model _____. Any alternate must have a written approval prior to bidding.
