

# Watts Series TWH Tankless Water Heater Valves

## Fast, Simple and Trouble-free!

Introducing the Watts Series TWH tankless water heater valves. Replace a bucket of fittings and potential leaks with our one-piece assemblies.

Watts Series TWH valves save you time by replacing four unions, three tees, seven nipples, two ball valves, two boiler drains, and two hose bib covers that are used in a typical tankless water heater installation. That's up to 18 fittings and 16 connections!

You'll also appreciate the clean, professional look of the installation and ease of service too.
