

Introducing the Watts Alkaline Water Filter

The innovative high-capacity, 3rd-party certified alkaline filter

Looking for alkaline filters for use with RO systems? Look no further.

The Watts Alkaline Water Filter increases alkalinity while offering higher capacity, longer filter life, more consistent release of minerals, and 3rd-party verification of pH & ORP specifications.

Innovative Features & Benefits:

1. **Made in the USA**
2. **Backed by 40+ years of water quality expertise**
3. **Filter life up to 3,000 gallons or 18 months**
vs. 800 gallons or 6 months with comparable filters
4. **Controlled TDS release: 40ppm (vs. 300ppm with comparable filters)**
5. **3rd-party verification by IAPMO for the following specifications:**
 - Filter life 18 to 24 months (vs. 6 months with comparable filters)
 - Increases pH to levels between 8 and 9.5
 - Decreases ORP between -600 and -150
 - Mixture of 4 proprietary ceramic beads

The Watts Alkaline Water Filter

Alkaline Filter Applications:

- Reverse osmosis (RO)
- Undercounter systems
- Ultrafiltration
- Standalone cartridges
- Distilled water

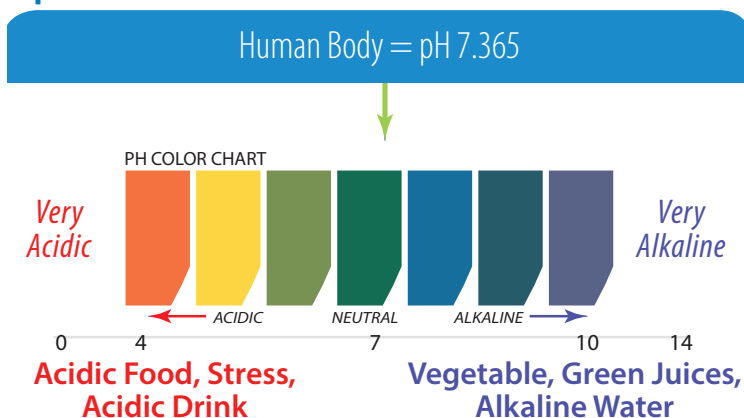

Vertical installation recommended.

Ordering Information

Model No.	Description	Includes
F560105	1/4" Alkaline Water Filter Kit	Filter, tubing, fittings & mounting clips
F560106	3/8" Alkaline Water Filter Kit	Filter, tubing, fittings & mounting clips
F105377	Alkaline Replacement Water Filter	Replacement alkaline filter only

pH Balance 101

pH is a measure of the acidity or basicity of liquids. A pH of 7 is considered neutral. Above 7 is considered basic or alkaline, and less than 7 is considered acidic.
